

*Automatic Unwinder*

# CARON VEGAS-DUO

At FASTSEWN, we know precision starts with perfectly flat fabric. That's why we've partnered with Caron's automatic unwinders - introducing the Vegas-DUO unwinding system.

**Specifications:**

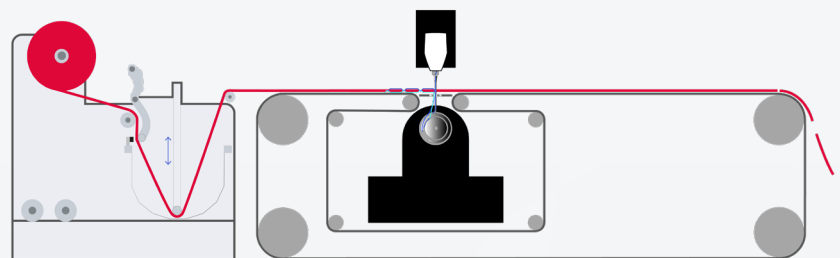

- Up to 100 - 200 kg / 220 - 440 lbs
- Useful widths: 180 - 320 cm / 71" - 126"
- Fabric roll max. diameter: 35/40 cm / 14"/16"

By combining a traditional expansion shaft (or simple shaft with closing cones) with a dual motorized roller system, Vegas-DUO lets you effortlessly switch unwinding methods to match your fabric and project needs.

Paired with FASTSEWN (model 18-18 and 33-33), it ensures the fabric lays perfectly flat, maintaining smooth, uninterrupted production, reducing handling errors, and keeping tension consistent for precise, high-quality results. Whether you're working with large rolls or specialty fabrics, the FASTSEWN + Vegas-DUO combination makes your workflow faster, more versatile, and completely reliable.

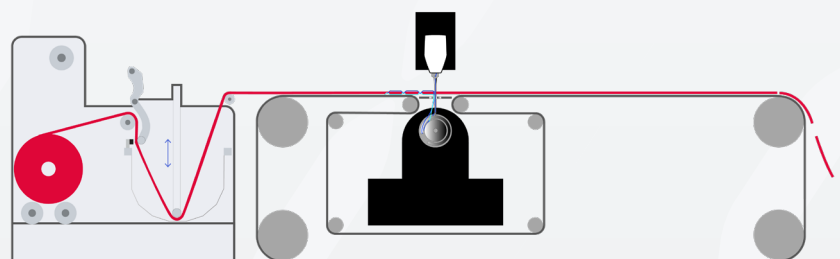

**HIGHLIGHTS**

- Adjustable feet for height alignment
- Automatic alignment of the fabric
- Electronic control of fabric tension
- Synchronization with electronic dancer bar or material loop
- Sensor for reading the material
- Metal platform for support of the fabric feeding
- Special metal support for the loop of fabric
- Pedal commands
- Red rope security system
- Ability to feed printed fabric face up or face down
- Usable for upholstery (furniture/automotive), technical textiles and digital printing
- Able to accommodate a broad range of fabric weights from light to heavy (approx. 170-330 GSM)
- Able to accommodate stretchy fabrics
