

AUTOMATED SOFT SIGNAGE PRODUCTION

Our patented MCT™ technology allows for a fully automatic process. No need for pre-cutting, frames or manual loading/off-loading. FASTSEWN will do it all.

What Graphic Products will the FastSewn Solution Optimize?

- SEG - both backlit and front lit
- SEG with contours and cut-outs for shelving or monitor
- Pillow Graphics with contours
- Custom pillow with contours
- Table Throws
- Flags & Banners
- Backdrops
- Booth sides & Displays
- Retail Alarm Covers

Fully Automated

- **Fully automated** sewing of keder, keder cutting and trim cutting.
- **Tangential steering** of keder tool.
- **Automatic loading** of new textile.
- **ROI** of 8-12 months (one FASTSEWN operator can operate multiple machines and match the output of 6-12 people).
- Import from **DXF or PDF**.
- Few steps to ready the machine.
- Sizes up to **3.3 x 3.3 m / 130 x 130 in.**
- **CO2 laser** or Oscillating knife tool.

Key Advantages

- Significantly reduces manual handling, cutting production time and cost.
- Increases efficiency and accuracy in fabric processing.
- Enables just-in-time, one-piece flow manufacturing directly from textile rolls.
- Supports a variety of materials and complex operations including laser and knife cutting.
- Facilitates precise control over sewing and cutting processes with minimal human intervention.
